

## The Magic of Custard Powder

create custard that is solid in one moment and then in another moment melts and turns to liquid.

**WARNING** - it will get a bit messy!

### Ingredients

\* Custard Powder

\* Water

### Step 1

Put the custard powder in a bowl

(It doesn't matter how much you use).

### Step 2

Pour water in and stir the mixture. Pour enough water in until the mixture looks like clay (as it does in the photo above).

### NOW THE FUN STARTS!

Roll the mixture into a ball and then watch it melt in the palm of your hand!
